EXECUTIVE SUMMARY

The purpose of a Safety Management System (SMS) is to implement a systematic approach to the development of safety policies, procedures, and practices that will achieve the safety objectives at Republic Airport (KFRG). As with any management system, this involves planning, organizing, leading, and controlling the safety practices of the airport.

The essential goal of an SMS is to inform, engage, and foster a culture based on safety and the proactive prevention of future incidents. Republic Airport defines its safety culture as an active airport community working together to provide routine operations on a daily basis without incident. A shared safety mindset places emphasis on safety education, situational awareness, communication, and the participation of all members of the Republic Airport community to be responsible for their part to provide a safe environment. It is these characteristics and attitudes that help to define the safety culture at Republic Airport.

Here at Republic Airport, we recognize the dynamic relationship that exists between employees and their working environment. Republic Airport proactively seeks to reduce the level of risk associated with all activities on the airport.

SAFETY POLICY

The safety of everyone affiliated with Republic Airport is a priority for New York State Department of Transportation, the owner and Senior Airport Management. Safety is an activity that requires deliberate effort and personal commitment from every member of the Republic Airport community. Republic Airport's proactive support of safety will ensure that all hazards and risks will be corrected expeditiously. Our commitment is to work alongside each of you to ensure the safest environment we can collectively achieve. Republic Airport pledges that disciplinary action will not be taken against any person reporting a safety hazard or safety concern. We encourage you to assume an active role in creating an atmosphere where safety is a priority.

SAFETY MANAGEMENT SYSTEM AT REPUBLIC AIRPORT

Confidential Hazard and Risk Reporting System

The Confidential Hazard and Risk Reporting System here at Republic Airport allows for the airport community to report risk and hazardous situations in a non inhibiting manner. By taking note of a potentially hazardous situation on the airport and filling out the form below, you are doing your part as an active community member of Republic Airport. Every report is confidential; there will never be a penalty for reporting an incident or hazard. Together with help from every tenant, student pilot, Fixed Base Operator and management/representative; Republic Airport will be better equipped to ensure safe and routine operations on a daily basis.

Please submit the form on the following page to Robert Yturraspe, Manager of Airport Services, Room 216, Republic Airport, Farmingdale, NY 11735 or info@republicairport.net, Pilot Information, Safety Management System, Hazard & Risk Reporting Form.

Thank you for doing your part to provide a safe airport environment here at Republic Airport.
