

DBE Goal

for Federal Aviation Administration Funded Projects

at Republic Airport for

FFY2020 – FFY2022

Part 1: Identify Market Area

NYSDOT identified the market area for Republic as the counties in which Republic is located and the counties where the contractors and sub-contractors that seek to do business with Republic are located. These counties are; Bronx, Kings, Nassau, New York, Queens, Richmond, Suffolk and Westchester in New York State.

Part 2: Projected Project Activity

The scope of FAA-assisted agreements for Republic Airport consists primarily of construction, landscaping, and surveying and engineering services. NYSDOT identified the applicable work codes in the North American Industry Classification System (NAICS) and they are listed below. To establish the availability of ready, willing, and able certified disadvantaged business enterprises we used the New York State Unified Certification Program directory. The County Business Patterns data from the US Census Bureau is the source of data relative to all available firms in the NAICS codes. We used the availability by NAICS to identify DBE opportunities on the project projects for Republic Airport in Federal Fiscal Years 2020, 2021 and 2022.
